# Programmer

#### Personal statement

➡ I am a technologist by heart, and I like tinkering with toys, symbols, concepts, and viewpoints. On the other hand, I am a concerned human being. I worry about the future, and I find the current lack of liberty and suffering in the world is inadmissible.

Because of that my objective is to work in a challenging and dynamic environment that allows me to help in making the world a better place by meaningful research and products.

## **Open Source Projects**

- **▶ DrFuzzy** is a nice small sample of my code. It is a plugin for the DrRacket IDE. It is also a bit outdated, but it is a full project, so it shows how I deal with the diverse aspects of software development.
- → Anything else on github. It is pretty dynamic in there, since I work on several different things at a time. Feel free to browse around.

#### **Technical Skills**

- **▶ Programming Languages**: I am proficient with Scheme and Ruby and I am familiar with C, Common Lisp, Javascript and SQL.
- **Taste**: I like to think that I have a little of that thing called taste. 

  Taste: I like to think that I have a little of that thing called taste.
- **Design philosophy**: I use design practices from these sources [1, 2, 3] as much as I can. I try my best to grow code from data analysis, using the paradigm that fits better to the problem.
- ▶ Programming practices: I try hard to do my work in an egoless and pragmatic fashion.
- **→ OS**: Any \*nix would be ok with me.
- → Platforms: Vim, Emacs more recently, and DrRacket for all schemy things.

## Recent Professional Experience

2009	<b>► Educator and Researcher</b> . I have been using HTDP and SICP textbooks to help colleagues	
	develop programming skills and taste.	

- **2009 Contractor for DevRepublic**. Basically the default rails "web 2.0" contract gig, involving building a project manager.
- **2007 Developer for AuctionPal** in their internal rails Auction Expert system. Mostly controller/model area of the MVC stack. Unfortunately the project was discontinued.
- **2007 Contractor for Ursa Minor for a Dupont green site**. I was an all around developer for the site, doing stuff from the UI(mostly AJAX) to the background and cart functionality.
